If this creature has treasure, it will be feeding upon recent victim. Roll up a random creature within this region setting and roll for its treasure. It will have at least one of the checks, so roll until you get at least one thing, whether it is copper, silver, and/or treasure items.

Example: This creature has taken down a Common Salamander: Roll to see if it has copper, then bronze, silver, electrum, white-gold, yellow-gold, black-gold and then treasure on it. If you roll for the all and did not roll high enough for the victim to have anything, roll again. Keep rolling until you get at least something. If you rolled, and you found copper on the victim, but you did not get any other roll-checks, you are done (it only had copper on it).

Description:

Fears: Fire and lightning storms.

Habitat: Crystal Desert.

Immunities: None.

Life-span: 800 years.
