

# Clothing, Fine

Roll in the "Clothing" Section of the Non-Magical Items in the Treasure Book to see what article of clothing has been found. The clothing rolled up will be of very fine quality and make for that particular item.

To know the value of the O.V.I. clothing, just multiply the value of the clothing piece rolled up in the Non-Magical Items "[Clothing](#)" Section by 1-D100 +35. If you do this, the value will be set for that item.

Example

If I rolled up a "Leather Cape", I would then go to the "Provisions" in the P Section of the Basic Rules Book and look up the value of a "Leather Cape".

I would then roll my % dice (1-D100) and add 35 to the number I just rolled. If I rolled a 44, I would then add  $35 = 79$ .

A leather cape sells for 7 white-gold. I would then multiply 7 white-gold x  $79 = 553$  white-gold.

The O.V.I. Leather Cape I just found is of very fine make, and is worth 553 white-gold.
