

# Level

This is how advanced a character is. At the creation of your character, you will be level 0

As you advance in levels, you will become stronger and stronger, increasing not only in physical durability, but in power (whether it be abilities, divine favors, trade-skills, or spells).

Modification points will be awarded you each and every time you level. You may use these Modification Points to buy up skills and powers, molding your character to your own desire and liking.

# Experience points

The following are the experience points need to advance to each level. Every time you level, you will drop the former experience points earned to level.

## Note

If you have earned 500 experience points and only needed 350 to level, you will start out the next level with 150 experience points. Sometimes, if you earn a lot of experience points, you can level more than once.

The following is the actual list of experience point qualifications listed on page #6 of your character sheet.
